

67536

67536 FRAGMENTAL BRECCIA OR CATACLASTIC ANORTHOSITE 1.20 g

INTRODUCTION: 67536 is a white, fine-grained, homogeneous and friable breccia (Fig. 1). It appears to be pure plagioclase and might be a cataclastic anorthosite. It is a rake sample collected near the White Breccia boulders and its powdery surface lacks zap pits.
