Track and Grains:

Microtomed samples:

Track 59

Track History:

Track 59 was prepared by Snead and Westphal at Berkeley on March 27, 2006. Keystone to Borg for synchrotron analysis after manufacture and on to Bajt for FTIR after that. Returned to UCB in June 06.

Track Characteristics:

Type: Carrot; Type A.

Length / Depth: ~321 μm

Grain diameters: ~3 μm .

Allocation History

Results

Track: Keystone analyzed by FTIR on June 7, 2006.
