

**Foil C2053,N**

**Sparsely populated foil; no crater > 5 um (at 200 x)**

**Foil was randomly searched at 1000X, yet not very many craters and insufficient to do good statistics.**

**Total of 4 craters found, all < 5 um**

**3 are “chondritic” (Mg, Si, S, Fe in variable proportions)**

**1 is indeterminate**
