## C2060W "Calverton"

## Stardust Cratering Subgroup Foil report. 28 June 2006

S.F. Green ${ }^{1}$, J.C. Bridges ${ }^{1}$, I.A. Franchi ${ }^{1}$, A.T. Kearsley ${ }^{2}$, M.J. Burchell ${ }^{3}$<br>${ }^{1}$ PSSRI, The Open University, UK; ${ }^{2}$ Natural History Museum UK; ${ }^{3}$ CAPS, University of Kent at Canterbury, UK.

## (1) General Information

General appearance: Short foil, $12 \times 1.5 \mathrm{~mm}$

- This foil has relatively minor damage although there is a noticeable horizontal grooving fabric.
- Iron-rich patches are ubiquitous across the foil. In addition Fe-rich grains a few microns in diameter are present within pits. They appear to be part of the foils which were exposed by the milling process.
Sample mounting: Held by two Sn -coated restraining wires on custom Al holder.
Foil Coordinates: Fiducial marks, size $5 \mu \mathrm{~m}$, milled in foil with ion beam near corners of long side:

All measured coordinates transformed to Coordinate system ( $X, Y$ ) with origin at fiducial mark ' X ' and $X$ axis towards fiducial mark 'X2' Units of mm .
Crater surveys:
Quanta 200D Dual Beam FIB-SEM. D ${ }_{c}$ measurement accuracy checked with etched quartz graticule.

- Manual survey image mosaic of entire foil (LOWRES): $15 \mathrm{kV}, 0.5 \mathrm{nA}, \mathrm{x} 135$ magnification, x1024 pixel resolution.
Area $=18 \mathrm{~mm}^{2}$. Estimated complete to $\mathrm{D}_{\mathrm{c}}=2 \mu \mathrm{~m}$.
- Automated surveys of smaller areas ( $2 \mathrm{~mm}^{2}$ and $3 \mathrm{~mm}^{2}$ ). $20 \mathrm{kV}, 0.6 \mathrm{nA}, \mathrm{x} 1000$ magnification, secondary electrons, $2048 \times 1792$ pixel resolution, Kalman frame (3) averaging. Working distance 7 mm . Resolution limited by flatness of foil over sub-area.
SA1: Nominal $3 \mathrm{~mm}^{2}$. Actual area $=3.25 \mathrm{~mm}^{2}$. Estimated complete to $\mathrm{D}_{\mathrm{c}}=0.8 \mu \mathrm{~m}$. Corners $(7.46,1.52)(10.55,1.60)(10.58,0.55)(7.49,0.46)$
SA2: Nominal $2 \mathrm{~mm}^{2}$. Actual area $2.17 \mathrm{~mm}^{2}$. Estimated complete to $\mathrm{Dc}=0.8 \mu \mathrm{~m}$. Corners $(4.51,1.40)(6.54,1.46)(6.57,0.40)(4.51,0.35)$.

## EDX measurements:

$15 \mathrm{KV}, 75 \mathrm{~s}$ acquisition times.

## C2060W "Calverton"

## (2) Crater Location

LOWRES manual survey of entire foil.
Target completeness limit $\mathrm{D}_{\mathrm{c}}=5 \mu \mathrm{~m}$. Estimated complete to $\mathrm{D}_{\mathrm{c}}=2 \mu \mathrm{~m}$.
Coordinates reproducible to $\sim 0.1 \mathrm{~mm}$ due to flexure of foil.
Randomly selected areas SA1 and SA2 to obtain completeness to $\mathrm{D}_{\mathrm{c}} \sim 1 \mu \mathrm{~m}$.
Craters that also appear in LOWRES survey are cross-referenced.
9 craters found.

LOWRES survey

| Crater | $X$ <br> $(\mathrm{~mm})$ | $Y$ <br> $(\mathrm{~mm})$ | $\mathrm{D}_{\mathrm{c}}$ <br> $(\mu \mathrm{m})$ |
| :---: | :---: | :---: | :---: |
| 1 | 9.42 | 0.06 | 9.0 |

| Crater | $X$ <br> $(\mathrm{~mm})$ | $Y$ <br> $(\mathrm{~mm})$ | $\mathrm{D}_{\mathrm{c}}$ <br> $(\mu \mathrm{m})$ |
| :---: | :---: | :---: | :---: |
| 101 | 7.93 | 1.5 | 0.7 |
| 104 | 10.47 | 0.68 | 0.6 |
| 108 | 10.44 | 1.6 | 0.6 |

SA2

| Crater | $X$ <br> $(\mathrm{~mm})$ | $Y$ <br> $(\mathrm{~mm})$ | $\mathrm{D}_{\mathrm{c}}$ <br> $(\mu \mathrm{m})$ |
| :---: | :---: | :---: | :---: |
| 102 | 4.76 | 1.13 | 0.9 |
| 103 | 5.79 | 1.32 | 0.6 |
| 105 | 4.57 | 0.96 | 0.8 |
| 106 | 5.27 | 0.42 | 1.0 |
| 107 | 6.44 | 1.04 | 0.5 |

## C2060W "Calverton"

## (3) Size distribution

Crater sizes are listed in crater location tables.
Size distributions for SA1 and SA2 plotted together.
Error bars reflect counting statistics only.

## C2060W "Calverton"

## (4) Images

A. Crater 1 showing ridge bisecting the crater floor. B. Fe-rich grain within foil exposed by milling of the foil. Fe-rich grains are spread across the foils. Secondary electron images.

## C2060W "Calverton"

(5) Composition

NB. A summary is given here. Quantitative analysis will be reported to the Min \& Pet Sub-Group.

| Crater | Elements detected | Interpretation |
| :---: | :--- | :--- |
| 1 | $\mathrm{Mg}, \mathrm{Fe}, \mathrm{S}, \mathrm{Si}$ | Mix of $\mathrm{Mg}-\mathrm{Fe}$ silicate and $\mathrm{Fe}-\mathrm{S}$ |
